NGUYỄN ĐỨC HOÀN

The State Securities Commission granting the Certificate for Offering of Covered Warrants only means that the Issuer's registration application has met the conditions and procedures under relevant laws. It does not imply a guarantee of the Prospectus content, nor does it imply that the investment in warrants is guaranteed or fully settled, nor does it endorse the Issuer's objectives, investment strategies, or business plans.

Investors are recommended to read carefully and understand the regulations in the Prospectus, especially the risk warning section from page 04 in this Prospectus, and note the fees, charges, and taxes when trading covered warrants.

The trading price of warrants may change depending on market conditions; investors may suffer losses on their capital and may lose the entire investment capital. Information on the performance of the Issuer and previously issued warrants (if any) is for reference only and does not mean that the investment will generate profit for investors.

(The rest of the page is intentionally left blank)

I. RISK FACTORS

Investors are advised to carefully read this prospectus and the accompanying documents to fully understand the contents of the covered warrants, the risks associated with investing in covered warrants, and at the same time assess the suitability of the investment in the covered warrant product with their investment objectives and financial situation. Investors are strongly advised to consult financial advisors, securities brokers or analysts prior to making any investment decision relating to this product.

Covered warrants are derivative financial instruments, complex in nature and not suitable for inexperienced investors. The issuer does not recommend any investment in covered warrants unless investors have a full understanding of the product and are willing to accept the investment risks described herein.

The issuer does not undertake any obligation to conduct investigations or research related to the underlying securities issuer. Warrant holders must not construe the issuance of covered warrants as any form of recommendation by the Issuer in relation to the underlying securities. In addition, holders should be aware that the companies or entities with underlying securities, or other related entities were not involved in the drafting of this prospectus..

1. Risks associated with the warrant issuer

- Risks from the issuer's transactions: The issuer may buy back warrants in the market, and these warrants can be held or canceled or resold. The issuer may enter into transactions for hedging purposes, and such transactions may have an impact on the market price of the covered warrants.
- Payment Risk: In the process of issuing warrants, although strict standards of solvency must always be complied with by the issuer, there is a risk that the issuer may become insolvent and unable to fulfill its payment obligations to covered warrant holders.
- Risk of warrant delisting: Warrants may be compulsorily delisted in the cases stipulated in Clause 6, Article 120 of Decree No. 155/2020/ND-CP as amended and supplemented. Therefore, there is a risk of warrants being delisted before the maturity date. The specific cases are as follows:
 - a. The underlying securities are delisted or their stock index cannot be determined;
 - b. The registration dossier for the offering of covered warrants contains inaccurate information or omits important details that could affect investment decisions, causing losses to investors; or when it is discovered that the issuer has not deposited sufficient funds to guarantee payment or does not have a bank guarantee for payment;
 - c. Issuer violates its risk hedging obligations or seriously violates its market-making obligations, leading to its market-making activities terminated in accordance with the regulations of the Stock Exchange.
 - d. The warrants have either been fully exercised or have expired;

e. The listed company has its Operating license in the specialized field revoked.

- **Risks from the Issuer's Autonomy:** Warrant holders should note that we have autonomy in our business operations in accordance with the terms of this Prospectus and may influence the warrant price. In the event of an acquisition or restructuring related to covered warrant holders' interests, we have the right to choose which warrant-related activities we deem appropriate. The issuer is committed to making prudent decisions. If parties with obligations to the issuer are unable to fulfill their obligations, this may affect the warrant's performance.
- **Risk due to conflict of interest:** The issuer is involved in various activities that may create a conflict of interest with the warrant holder. The issuer can issue and list other warrants that could affect the price of this warrant.

2. Risks associated with warrant products

- **General investment risk:** Holders should be knowledgeable about warrant valuation methods and should only trade after careful consideration. Warrants are suitable for investors who understand the risks and pricing mechanisms involved. An investment in warrants is not equivalent to an investment in the underlying asset. Although the return of an investment in warrants is closely related to changes in the price of the underlying asset, the change in warrant price relative to changes in the underlying asset price may not be equivalent. The high leverage of warrants means that holders will have a higher investment risk compared to investing the same value in the underlying asset.
- **Risk due to the maturity date of warrants:** Because warrants have an maturity date, their price can decrease as the maturity date approaches, and this price reduction can be quite significant. If an investor holds the warrant until the maturity date and the settlement price is less than or equal to the exercise price, the warrant's price will be zero, resulting in a loss equal to the amount invested in purchasing the warrant. Therefore, before deciding to invest in warrants, investors need to carefully study the price trend of the underlying security during the warrant's validity period.
- **Price risk:** This is the risk arising from changes in the price of warrants. Changes in warrant price depend on many factors such as the price of the underlying security, the degree of volatility of the underlying security's price, the remaining validity period of the warrant, interest rates, dividends of the underlying security, etc., among which the most important factor is the price of the underlying security. In addition, the price of warrants also depends on the supply and demand of the warrant market. Although issuers usually issue warrants volume according to the registered quantity with the State Securities Commission, the issuer can still increase the volume of warrants offered through supplementary issuance, provided that the issuance limit does not exceed the maximum issuance limit stipulated by the State Securities Commission. This supplementary issuance can affect the price of the warrants.
- **Leverage risk:** Investing in warrants only involves the change in the price of the underlying

security and not directly investment in the underlying security. Therefore, investors benefit from the leverage nature of warrants by being able to receive the full change in the price of the underlying security while only having to pay a portion, not the full price of the underlying security. Additionally, the rate of change in the warrant's price on the market can be greater than the rate of change in the underlying security's price, so investors can gain profit or lose more than they would by directly investing in the underlying security.

- **Liquidity risk:** This is the risk that investors cannot sell warrants at their desired price due to a lack of liquidity in the market for those warrants. The liquidity of warrants depends on market supply and demand and the effectiveness of the issuer's market-making activities. Although the issuer commits to market-making and providing liquidity to the warrant market, the issuer does not guarantee that the warrant trading market will be active.
- Investors holding warrants do not have the same rights as shareholders owning the underlying security, including but not limited to the right to attend the General Meeting of Shareholders, receive dividends, the right to subscribe to newly issued shares, or other rights arising from the underlying security.

3. Risks associated with the underlying securities

Certain events (including the issuance of bonus shares or cash distributions by the Company, splitting or consolidation of the underlying securities, or restructuring events affecting the Company) may lead to adjustments to the warrants terms. However, the issuer is not obligated to adjust the terms and conditions of the warrants for every event related to the underlying securities. Any adjustments or non-adjustments decision will affect the value of the warrants. Warrant adjustments will be made in accordance with legal regulations. Additionally, certain events (including delisting or suspension of trading of the underlying securities) may result in the warrants being delisted or suspended in accordance with legal regulations.

4. Other risks

4.1. Economic risks

In a market economy, the business activities of enterprises are generally closely linked to the development of the Vietnamese economy. Economic growth creates many opportunities for businesses to develop, expand production and business activities, and attract more foreign investment. In the trend of global economic integration, businesses will face numerous challenges due to competitive pressure, market penetration, and expansion into new markets. Economic development prospects are always affected by many unpredictable and volatile factors, which, when they occur, quickly and directly impact business operations. This indirectly affects the development of the stock market in general and the development of warrants in particular.

4.2. Legal risks

Currently, Vietnam's legal framework is being perfected and constantly updated to align with

the general development trends of the economy and society. Therefore, enhancing the stability of State legal policies is crucial for businesses, especially as the Vietnamese economy gradually integrates with the continuous development of the global economy. To mitigate the risks associated with legal issues, businesses, including ACBS, will proactively and regularly update their knowledge of legal regulations to make appropriate adjustments during operations.

Operating as a Limited Liability Company, ACBS is governed by the Enterprise Law, the Securities Law, and related guiding documents. Any changes to these legal documents will affect the Company's operations.

4.3. Political risk

Political events and changes in government policy will always affect the economy and, consequently, the business operations of enterprises.

4.4. Tax risks when exercising rights

According to tax regulations, when exercising rights to warrants that expire in a profitable state, investors may face the risk that the amount of tax they have to pay may exceed the amount of payout they receive. Therefore, investors need to consider these issues during their investment process.

The business operations of the issuer, as well as the expectations of investors, may be affected by other force majeure risks such as natural disasters, epidemics, wars, or the impact of political and social changes in the world, etc. This not only affects the business operations of the issuer but also the issuer of the underlying securities, thereby indirectly affecting the price of warrant products.

II. PERSONS PRIMARILY RESPONSIBLE FOR THE CONTENT OF THIS PROSPECTUS

- **The underlying securities issuer** is the organization that issues securities as the underlying asset of the warrant.
- **Warrant issuer** (hereinafter referred to as issuer, or issuer) is a securities company that issues warrants.
- **A custodian bank** is a bank that deposits and supervises assets deposited by the warrant issuer to secure payment for the issued warrants, and is not a related person of the issuer in accordance with the securities law.

- **The warrant holder** is an investor who owns warrants, who is also a partially secured creditor of the issuer, but is not the warrant issuer.
- **The exercise price** is the price used by the issuer to determine the payment to the warrant holder.
- **Conversion ratio** indicates the number of warrants required to be converted into a unit of the underlying security. The conversion ratio is rounded to four decimal places.
- **Maturity date** is the date on which the warrant holder can exercise the warrant and the issuer must make payment for warrants that generate profit.
- **Outstanding warrants** are warrants that have not yet expired and are currently held by the warrant holder.
- **Issued but not outstanding** are warrants that have been issued but not yet owned by investors.
- **Issuer's open warrant position** includes all outstanding warrants that have not yet been exercised.
- **The theoretical hedging position** is the expected quantity of underlying securities required to be held to hedge against risks for warrants, as determined in accordance with the issuer's hedging plan.
- **The actual hedging position** is the position determined by the quantity of actual underlying securities held, the quantity of underlying securities pending delivery in the proprietary trading account used for hedging purposes, the quantity of securities arising from the exercise of rights (stock dividend payments, share issuances to increase share capital from owner's equity) derived from the actual securities held in the proprietary trading account used for hedging purposes, and the converted quantity of securities in the event that the issuer uses hedging securities that share the same underlying security as the warrants. Securities sharing the same underlying security as the warrants include actual securities held in the proprietary trading account and securities pending delivery in the proprietary trading account.
- **In-the-money warrant (ITM)** is a call warrant whose exercise price is lower than the price of the underlying security.
- **Out-of-the-money warrant (OTM)** is a call warrant whose exercise price is higher than the price of the underlying security.
- **At-the-money warrants (ATM)** are call warrants whose exercise price is equal to the price of the underlying security.
- **Delta; Delta hedging factor** is the change in the warrant price in response to a change in

underlying price, calculated based on the Black-Scholes formula.

Formula for calculating Delta:

$$\text{Delta} = \frac{\text{Change in warrant price}}{\text{Change in underlying price}}$$

- **The Black-Scholes formula** is a mathematical formula used to price financial instruments, most notably European options, assuming that the prices of these instruments follow a normal distribution.
- **The payment price of the warrant upon exercise of the right** is the average closing price of the underlying securities during the five (05) trading days immediately preceding the maturity date, excluding the maturity date.

IV. INVESTMENT OPPORTUNITIES

1. Overview of the Vietnamese economy

Vietnam's macroeconomic data for April 2026 continued to reflect a resilient growth outlook, although divergences beneath the headline figures have become increasingly evident. Industrial production, FDI disbursement, international tourist arrivals, and public investment spending remained key pillars supporting economic activity.

However, several bottlenecks became more apparent compared with March. Headline inflation officially exceeded core inflation; real consumption growth continued to lag nominal retail sales growth; import growth outpaced exports; and the recovery in manufacturing remained concentrated within a relatively narrow group of industries.

- **In April, headline CPI increased by 0.84% MoM and 5.46% YoY.** On a cumulative basis, average CPI for the first four months of 2026 (4M2026) rose 3.99% (4M2025: +3.20%), approaching the National Assembly's inflation target of around 4.5%. Meanwhile, average core inflation for 4M2026 increased by 3.89% (4M2025: +3.05%).
- **Total retail sales of goods and consumer service revenues reached VND 646.3 trillion in April, up 12.1% YoY.** Cumulatively, retail sales and consumer service revenues totaled VND 2,546.6 trillion in 4M2026, representing growth of 11.1% (4M2025: +9.9%). However, after adjusting for price effects, real retail sales growth was only 6.3%, compared with 7.7% in the same period of 2025.
- **The Index of Industrial Production (IIP) increased by 3.0% MoM and 9.9% YoY in April, bringing 4M2026 IIP growth to 9.2% (4M2025: +8.6%).** The manufacturing and processing sector remained the primary growth driver, expanding by 10.0% YoY in April and 9.9% during the first four months of the year.

- **Exports reached USD 45.52 billion in April (+21.0% YoY, but down 2.0% MoM), while imports rose to USD 48.80 billion (+32.5% YoY and +3.6% MoM).** As a result, the trade deficit widened to USD 3.28 billion in April, pushing the cumulative trade deficit for 4M2026 to USD 7.11 billion, in sharp contrast to the USD 4.3 billion trade surplus recorded in the same period of 2025.
- **Total registered FDI reached USD 18.24 billion in 4M2026, up 32.0% YoY, although the composition of inflows showed notable divergence.** Newly registered projects attracted USD 12.15 billion, more than 2.2 times the level recorded in the same period last year, while capital contributions and share purchases (M&A transactions) totaled USD 2.96 billion, up 61.9% YoY. In contrast, additional registered capital for existing projects amounted to only USD 3.13 billion, down 51.0% YoY. FDI disbursement continued to improve, reaching USD 7.40 billion (+9.8% YoY), marking the highest four-month disbursement level in the past five years.
- **Public investment disbursement from the state budget reached VND 54.8 trillion in April, up 8.2% YoY.** Cumulative disbursement in 4M2026 totaled VND 187.1 trillion, representing growth of 10.4% YoY and fulfilling 19.7% of the annual plan, slightly above the 16.7% achieved during the same period of 2025. On the fiscal front, budget revenue continued to outpace expenditure. State budget revenue reached 44.0% of the annual estimate (+15.2% YoY), while expenditure amounted to only 21.2% of the annual budget plan (+11.6% YoY).

As of 23 April 2026, credit growth reached approximately 4.11% YTD, while deposit growth stood at only 2.19% YTD. The widening gap between funding mobilization and credit demand continued to expand, indirectly sustaining pressure on liquidity within the interbank market.

- During April, the State Bank of Vietnam (SBV) continued to manage system liquidity flexibly through Open Market Operations (OMO). Outstanding OMO balances remained relatively stable throughout the month at around VND 300 trillion.
- Liquidity support was primarily provided through State Treasury deposit auctions and deposit maturities. Treasury deposits consistently remained above VND 600 trillion, with the end-April balance estimated at nearly VND 670 trillion.
- Interbank interest rates remained stable and continued to trade at a premium relative to USD funding rates. Together with robust FDI inflows, this helped mitigate exchange-rate pressures despite Vietnam recording a trade deficit of USD 3.3 billion in April.
- **Looking ahead to the second half of 2026, we expect deposit and lending rates to remain elevated relative to 2025 levels,** as structural funding constraints within the banking system have yet to fully keep pace with credit demand. Nevertheless, the State Bank of Vietnam

(SBV) may consider targeted policy easing measures, including adjustments to liquidity safety requirements and preferential conditions for strategically important projects, while maintaining nominal interest rates at sufficiently supportive levels to preserve exchange-rate stability and contain inflationary pressures.

2. Vietnam's financial market and investment opportunities

The Vietnamese stock market, represented by the VNIndex, surpassed its 2022 peak (1500 points) in July 2025 and set a new high of over 1900 points in January 2026. The index is currently testing new support levels and trends for the next 12 months.

In terms of valuation, the P/E ratio of the VNIndex is around 14.x and the VN30 is around 14.x. This valuation, in the context of Vietnam's GDP growth aiming for double digits in 2026, creates investment attractiveness in the Vietnamese stock market over the next 6-12 months, considering both growth and valuation trends.

In terms of liquidity, the trading value on the VNIndex is currently around 25-35 trillion VND per session.

The VNIndex has surpassed its historical peak and is establishing a price channel for a new cycle.

(Source: Fireant.vn, ACBS compilation)

3. Investment opportunities in warrants

Cover Warrants are a product issued by securities companies, listed and traded on the HOSE (Ho Chi Minh Stock Exchange). This product provides investors with a risk hedging tool, as well as diversification and increased efficiency for their investment portfolios when the stock market experiences significant volatility. With high leverage, this is an opportunity for investors with small capital to access shares of good companies in the market through warrants. A small change in the price of the underlying security can lead to a larger change in the price of the warrant.

The price of a call option depends heavily on the price of the underlying security, the overall market trend, and several other factors. When investing in call options, the potential profit is unlimited if the price of the underlying security moves upwards as expected. Meanwhile, the maximum loss is fixed if the price of the underlying security moves downwards as predicted, and this loss is also the cost of purchasing the call option for the investor.

The timing and methods for trading warrants are similar and convenient to those for underlying

securities traded on the HOSE. Investors do not need to open a separate trading account to invest in warrants. Furthermore, issuers must fulfill their market-making obligations for the warrants they issue, as stipulated by regulations, which contributes to ensuring liquidity and attracting more interested investors.

For foreign investors, warrants are an attractive investment product because there are no limits on the percentage of foreign investment, unlike when investing in underlying securities. Therefore, the Vietnamese stock market in general, and warrants in particular, will attract international financial institutions, creating a broader playing field for investors and demonstrating the professionalism of the market.

However, because warrants are a type of security with unique characteristics, we recommend that investors conduct thorough research before making investment decisions in order to minimize potential risks and losses.

V. INFORMATION ABOUT THE COVERED WARRANT ISSUER

1. General information on the Covered Warrant (CW) Issuer

1.1. Formation and Development History

ACB Securities Company Limited (ACBS) was established under business license No. 06/GPHDKD issued by the State Securities Commission (SSC) on June 29, 2000. Its head office is located at: 3rd Floor, Léman Luxury Building, 117 Nguyen Dinh Chieu Street, Xuan Hoa Ward, Ho Chi Minh City. ACBS's current charter capital is VND 11,000 billion.

In 2000: The State Securities Commission granted operating license No. 06/GPHDKD dated June 29, 2000, to ACB Securities Company Limited, established with 100% equity owned by Asia Commercial Bank (ACB). The initial charter capital was VND 43 billion (Forty-three billion dong). Since inception, ACBS has been authorized by the State Securities Commission to conduct statutory securities business operations, including: Securities brokerage; Proprietary trading; Underwriting; Portfolio management; Investment advisory.

2005: ACBS completed its first capital increase, raising its charter capital to VND 100 billion (One hundred billion dong).

2006: In May 2006, the company completed its second capital increase, raising its charter capital to VND 250 billion (Two hundred and fifty billion dong). The head office was moved to 9 Le Ngo Cat Street, Ward 7, District 3, Ho Chi Minh City.

2007: In September 2007, the company completed its third capital increase, raising its charter capital to VND 500 billion (Five hundred billion dong). ACBS officially launched its online trading system, enabling internet-based transactions secured by digital certificates.

2008: On September 4 2008, ACBS completed its fourth capital increase, raising its charter capital to VND 1,000 billion (One trillion Vietnamese Dong). The head office moved to 107N Truong Dinh Street, Ward 6, District 3, Ho Chi Minh City. Concurrently, the Portfolio Management license was revoked in compliance with State Securities Commission regulations.

2009: On November 4 2009, ACBS completed its fifth capital increase, raising its charter capital to VND 1,500 billion (One thousand five hundred billion Vietnamese Dong). Brand positioning with core values: Safety, Accuracy, Confidentiality, Creativity.

2010: Launched a dedicated Contact Center via 1900 5555533 for trading. Changed the security method from digital certificates to USB Tokens for Internet transactions.

2011: ACBS was honored by Asiamoney Magazine with a number of prestigious awards, including: Best Customer Service Quality; Best Trade Exercise; Best Event and Seminar Organization; Best Investment Opportunity Presentation and Corporate Meeting Organization; and Best Broker.

2012: ACBS officially implemented the SWIFT connectivity with overseas custodian banks. The company ranked 3rd in brokerage market share on both the HOSE and HNX exchanges.

2013: ACBS introduced the ACBS Trading mobile trading application for devices running the IOS operating system.

2014: On June 13 2014, ACBS relocated its head office to 41 Mac Dinh Chi Street, Da Kao Ward, District 1, Ho Chi Minh City. The core values changed: Integrity, Efficiency, Harmony, Prudence, Innovation.

2015: Officially launched a new, modern, safer, and more secure trading system. Launched the ACBS Trading platform for desktops, laptops, and mobile devices using the Android operating system. Recognized among the Top 10 Most Representative Securities Companies in the Vietnamese stock market.

2016: On January 6, 2016, the new brand identity system was launched and officially put into use, based on the core values of "Trustworthy - Friendly - Agility". On April 22, 2016, Inaugurated the Bau Cat Transaction Office; the new trading system was successfully improved to be more modern, efficient, secure, and reliable; and the company was one of four securities companies honored and awarded a certificate of merit by the People's Committee of Ho Chi Minh City for its outstanding performance over consecutive years.

2017: Established the Dong Nai branch; Launched the ACBS Trade application, enabling investors to conduct online stock trading on iOS and Android; Q3/2017: Established the Mac Dinh Chi 4 branch; Organized the "TRADE PRO 2017" competition for students interested in securities and those majoring in economics, finance, securities, or banking in Ho Chi Minh City. ACBS was honored among the Top 10 outstanding member securities companies; Launched the Top Trader – Talented Investor program.

2018: Continued to organize the ACBS Trade Pro competition for students interested in securities and those majoring in economics, finance, securities, or banking in Ho Chi Minh City. Celebrated the 18th anniversary of ACB Securities Company Limited. Honored among Top 10 outstanding member securities companies of both HNX and HSX.

2019: On May 20th, ABCS signed a cooperation agreement with EFG Hermes. The Cho Lon

branch was relocated to 321-323 Tran Phu Street, Ward 8, District 5, Ho Chi Minh City.

2020: The company issued its first covered warrants and achieved a highly successful initial offering, with the subscription volume exceeding 50% in its initial IPO.

2021: ACBS increased its charter capital to VND 3,000 billion (Three trillion VND). Launched the S-eyes, an online securities account opening service integrated eKYC technology.

2022: ACBS relocated its Head Office to the 3rd Floor, Léman Luxury Building, 117 Nguyen Dinh Chieu Street, Vo Thi Sau Ward, District 3, Ho Chi Minh City. Released a comprehensive upgrade of mobile trading application, The ACBS SMART with a modern and market-aligned interface.

2023: ACBS increased its charter capital to VND 4,000 billion (Four trillion VND), and concurrently established the Mac Dinh Chi Branch and the Dong Saigon Branch. It was honored as an Outstanding Member in Securities Depository Operations in 2023 by the Vietnam Securities Depository and Clearing Corporation (VSDC).

2024: ACBS increased its charter capital to VND 7,000 billion (Seven trillion dong). Successfully implemented a new securities trading system (trading core); was honored as one of the Top 10 reputable companies in the Financial industry in 2024 by Vietnam Report and Vietnamnet newspaper; and won the Asian Outstanding Enterprise award, granted by APEA.

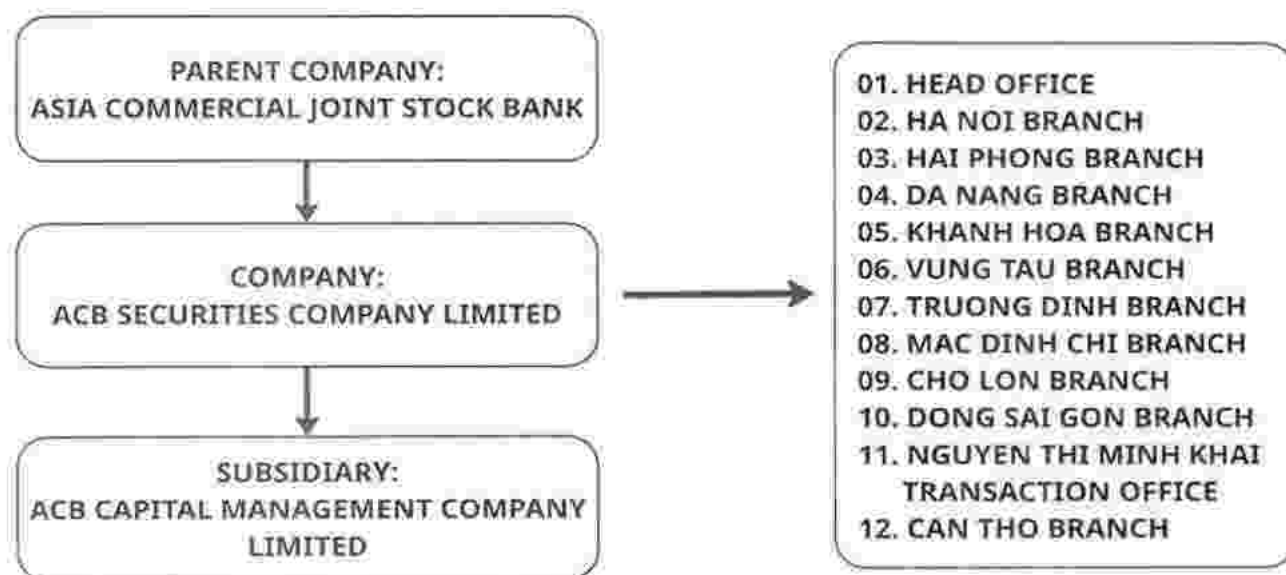

2025: ACBS increased its charter capital to VND 10,000 billion in January 2025 and subsequently raised an additional VND 1,000 billion, bringing total charter capital to VND 11,000 billion in April 2025. The company has received awards such as Fast-Growing Enterprise and Outstanding Asian Enterprise recognized by APEA; Outstanding Digital Transformation Product recognized by the Vietnam Financial Advisors Community (VWA) and Investment Newspaper; and Top 10 Reputable Companies in the Financial Industry recognized by Vietnam Report.

1.3. Company's management structure

(Source: ACBS)

✦ Board of Supervisors:

The Board of Supervisors comprises from 01 (one) to 03 (three) Supervisors, who are appointed and dismissed by the Company's Owner. The term of office of each Supervisor is 05 (five) years, and a Supervisor may be reappointed for an unlimited term. The Supervisor is responsible before the law and the Company's Owner and the Board of Members for the exercise of their rights and obligations.

✦ Board of Members:

The Board of Members comprises from 3 (three) to 7 (seven) members, who are appointed and dismissed by the Company's Owner for a term of 5 (five) years; Acting on behalf of the Company's Owner to exercise the rights and obligations of the Company Owner; acting on behalf of the Company to exercise the rights and obligations of the Company, except for the rights and obligations of the President & CEO; and being responsible before the law and the Company's Owner for the exercise of the assigned rights and obligations as stipulated in the Company Charter, the Law on Enterprise, and other relevant laws and regulations.

Units under the Board of Members (BOM)

✦ Human Resources and Remuneration Committee:

A specialized body under the Board of Members, responsible for making proposals and providing advice to the Board of Members on the implementation of human resource management and remuneration, with a view to building, training and developing human resources, and designing an organizational structure that effectively supports ACBS's development needs.

✦ Risk Management Committee:

A specialized body under the Board of Members, responsible for making proposals and providing

advice to its the Board of Members and the President & CEO in making decisions relating to risk management at ACBS.

✦ **Investment Committee:**

A specialized body under the Board of Members, responsible for making proposals and providing advice to the Board of Members in making decisions relating to investment activities at ACBS.

✦ **Asset-Liability Management Committee (ALCO Council):**

A specialized body under the Board of Members, responsible for making proposals and providing advice to the Board of Members in making decisions to maintain a sustainable balance sheet, ensure liquidity and efficiency, and thereby maximizing profits according to ACBS's risk appetite, risk-bearing capacity and equity base.

✦ **Information Technology Committee (IT Council):**

A specialized body under the Board of Members, responsible for making proposals and providing advice to the Board of Members on information technology matters to ensure the implementation of IT development in line with ACBS's business development strategy in each period.

✦ **Internal Audit Department:**

Internal Audit Department is a specialized function under the Board of Members, responsible for independently assessing compliance with laws, the Charter, and decisions of the Board of Members; reviewing and evaluating the adequacy, effectiveness and efficiency of the internal control system under the Board of Directors; assessing the compliance of business operations with internal policies and procedures; participating in the development of internal policies and procedures; evaluating compliance with legal regulations; reviewing controls and measures for safeguarding assets; assessing internal controls over financial reporting and business processes; evaluating the process of identifying, assessing, and managing business risks; evaluating the effectiveness of operations and compliance with contractual commitments; controlling the information technology system; investigating internal violations within the Company; conducting internal audits of the Company and its subsidiaries; and carrying out inspections and assessments of specific activities as required by the Board of Members, the Chairman of the Board of Members, the Board of Supervisors, and the Owner. The Internal Audit Department performs its functions on the principles of independence, integrity, objectivity, and confidentiality.

✦ **President & CEO:**

The President & CEO is the person in charge of all daily business operations of the Company, appointed or hired by the Owner for a term as stipulated by the Owner from time to time, and may be reappointed for an unlimited number of terms; subject to the supervision of the Owner and the Board of Members, and accountable to the Owner, the Board of Members, and the law for the exercise of assigned rights and duties.

Assisting the President & CEO are the Executive Vice President, each assigned to oversee different areas of work.

Units under the President & CEO

✦ Business Committee:

The Business Committee is a specialized body reporting directly to the President & CEO, established to make proposals and provide advice to the President & CEO in making decisions for the implementation of the business functions as delegated/authorized by the Board of Members in each period.

The organizational structure is divided as follows:

- a) **The distribution channel** (branches, transaction offices, and trading floors) is the profit center, the point of direct contact with individual and institutional clients (excluding financial institutions) to carry out business tasks, responsible for finding, developing, caring for, and managing clients, and providing client products and services including brokerage, investment consulting, providing and advising on the use of custody, pledging, and negotiated trading services for unlisted shares, etc., to clients, and updating and providing clients with market, legal, and professional information.
- b) **The Securities Business Unit consists of 02 (two) Departments:** Institutional Brokerage Services Department and the Priority Client Securities Services Department.
 - i. **The Institutional Brokerage Services Department** is a business unit at the Head Office responsible for identifying, developing, nurturing, and managing clients, as well as providing products and services to domestic and international institutional clients. It performs brokerage and investment advisory services, processes buy and sell orders for domestic and international institutional clients, and updates and provides market analysis, transaction information, and in-depth securities investment analysis to clients.
 - ii. **The Priority Client Securities Services Department** is a unit that advises and provides priority client services at the Head Office, providing advice, management, and implementation of sales policies, focusing on product distribution and developing the priority client segment (including individual clients with large transactions...).
- c) **The Investment Unit comprises 05 (five) Departments:** Corporate Advisory Department; Proprietary Investment Department; Derivatives Market Department; Treasury Department; Fixed Income Department.
 - i. **The Corporate Advisory Department** is a business unit directly under the Head Office, providing financial advisory services related to capital markets, debt markets, mergers and acquisitions advisory services, and other corporate financial advisory services related to the use of capital at ACBS.
 - ii. **The Proprietary Investment Department** is a business unit at the Head Office that directly conducts investment trading activities in stocks.
 - iii. **The Derivatives Market Department** is a business unit at the Head Office that directly conducts business operations related to derivative products, covered warrants, and

structured financial products.

- iv. **The Treasury Department** is a business unit at the Head Office that directly carries out the Company's capital business operations in each period to optimize costs and increase profits for the Company; manages the Company's assets and liabilities according to the direction of the ALCO Board; and manages the Company's liquidity to ensure liquidity for business operations and compliance with regulations.
- v. **The Fixed Income Department** is a business unit at the Head Office, under the Investment Division, with the following functions:
 - Develop investment strategies, policies, and business processes for bond trading in accordance with ACBS's direction for each period;
 - Organize and implement investment activities and purchase corporate bonds;
 - Organizing activities related to the distribution of corporate bonds to the market, including offering, investment advisory, and customer service for institutional clients, with the aim of expanding the client base and generating revenue from service fees; valuation;
 - Analyzing developments in the financial market, interest rate trends, corporate credit conditions, and macroeconomic factors ensures optimal investment efficiency and risk mitigation.
 - Participate in building and developing the bond trading system.
- d) **The Retail Securities Services Department** is responsible for managing, developing, and caring for clients who do not hold positions within the Distribution Channel. This care is provided through online tools and platforms to increase clients' assets and transaction value at ACBS.
- e) **The Business Solutions and Client Service Department** supports the Board of Directors and coordinates with operational units in developing and implementing business policies, product policies, commission policies, and managing business performance in the distribution channel; the Individual Customer Securities Services Department, the Priority Customer Securities Services Department, and the Institutional Customer Securities Services Department.
- f) **The Market Analysis and Strategy Department** supports the company's business units by providing analytical reports, market outlook reports, securities analysis, strategic reports, competitor and market surveys to improve customer service quality and increase investment value for the company and its clients.
- g) **The Risk Management Unit consists of 03 (three) Departments:** Risk Management Department; Internal Control Department and Legal Department.
 - i. **The Risk Management Department** is responsible for identifying, assessing, and monitoring risks; developing and implementing risk management policies; approving credit applications; proposing risk mitigation solutions; and advising management on

appropriate course of action.

- ii. **The Internal Control Department** is the unit responsible for inspection, control, supervision, and warning; including but not limited to controlling compliance and monitoring operations in accordance with the law, the Company Charter, decisions of the Board of Members, regulations, rules, procedures, work processes, work instructions, risk management processes of the company, of relevant departments/divisions/sections, and of securities professionals within the Company.
 - iii. **The Legal Department** is responsible for advising and consulting on legal issues related to the Company's business operations; it also serves as the focal point for handling and recovering bad debts, ensuring compliance with current regulations.
- h) The Operations Unit consists of 04 (four) Departments: Securities Operations Department; Application and Product Development Department; Infrastructure Development and Information Technology Operations Department; Data and Analytics Department.**
- i. **The Securities Operations Department** is a functional unit at the Head Office responsible for organizing, managing, and supporting the implementation of securities-related operations for all units within the Company.
 - ii. **The Application and Product Development Department** supports the Board of Directors in planning and building the roadmap for the development and implementation of technology within ACBS; collaborates with other units within ACBS to implement technology solutions to serve business efficiency and support the achievement of ACBS's overall business goals; implements digitalization, automation, and business process optimization to minimize manual work, improve operational processes, and increase labor productivity.
 - iii. **The Infrastructure Development and Information Technology Operations Department** is responsible for developing infrastructure, managing security, and ensuring the stable, continuous, and secure operation of information systems in accordance with the Securities Law, relevant government agencies, and ACBS; and managing the overall information system architecture to ensure stability, interoperability, and scalability to support the Company's long-term development strategy.
 - iv. **The Data and Analytics Department** is responsible for managing and exploiting data, implementing data enrichment and data analysis activities to propose specific measures to improve ACBS's business efficiency and sales; it is the central point for providing data, reports, and analyses as needed by ACBS units.

- Mr. Dang Quang Huy – Liquidity and Market Risk Management Functional Manager.
- Professional certification issued by the State Securities Commission: Financial Analysis
- Experience: 8 years of experience working in the finance and securities industry.

2. Information regarding the performance of the issuer

2.1. Summary of the Issuer's Operations

✦ **Operating situation of the Issuer:**

ACBS's main business activities :

In the first quarter of 2026, ACBS continued to deliver solid business performance, characterized by strong asset growth and sustained profitability. The Company maintained a sound financial position, supported by ample liquidity and a strong capital base, as summarized below:

- Total assets reached approximately VND 40.1 trillion, representing an increase of 32% compared to the same period of the previous year.
- Customer margin loans outstanding amounted to approximately VND 19.6 trillion, up 108%

year-on-year.

- Total borrowings reached approximately VND 24,9 trillion, an increase of 48% year-on-year.
- Profit before tax amounted to VND 303 billion.
- Profitability remained solid, with return on average assets (ROA) and return on average equity (ROE) reaching 2.48% and 6.77%, respectively.
- Asset quality remained strong, with no non-performing loans recorded.
- Brokerage remains ACBS's core business, supported by a nationwide network of 12 branches and transaction offices. The Company aims to rank among the Top 10 securities companies by brokerage market share in the Vietnamese stock market.
- In addition to brokerage activities, ACBS recorded profit after tax of VND 240 billion in the first quarter of 2026, primarily driven by investment activities in financial assets and margin lending operations. Other business segments, including securities custody services, corporate finance advisory services, and related securities services, continued to contribute stable earnings. ACBS currently does not engage in securities underwriting activities.

Major investments :

As of the close of trading on 31 March 2026, the VN-Index closed at 1,909 points, representing an increase of more than 2.5% year-to-date. Total market capitalization at the end of Q1 2026 reached over VND 8,726 trillion, equivalent to approximately 78% of GDP. Despite market volatility, ACBS's investment results, supported by timely decisions from the Investment Committee, still delivered positive performance, while maintaining an investment approach characterized by strict risk containment.

In parallel with changes in investor behavior and risk appetite in the underlying market, covered warrant investors became more defensive and accepted significantly lower valuations compared to the 2021–2023 period. Leveraging its operational experience since 2020, ACBS has enhanced its product offerings and attracted greater investor attention, thereby increasing its market share in the covered warrant market and maintaining a stable position among the Top 3 market makers in Vietnam. ACBS's covered warrant products have gradually become more competitive, serving as both a hedging instrument and an alternative investment channel for investors with a preference for large-cap stocks. This trend is expected to continue and further develop in 2026.

Under the stock market development strategy to 2030 recently approved by the Prime Minister, equity market capitalization is targeted to reach 100% of GDP by 2025 and 120% of GDP by 2030, nearly doubling the current market size. Outstanding bond market value is expected to reach at least 47% of GDP (of which corporate bonds account for at least 20% of GDP) by 2025 and at least 58% of GDP by 2030. In line with these developments, ACBS's investment strategy for 2026 will require significant expansion in both scale and quality, aiming not only to generate returns for the Company and its shareholders but also to deliver value to clients utilizing ACBS's investment-related services.

Subsidiaries and associates

ACB Capital Management Company Limited (ACBC) is a subsidiary of ACBS, established

under operating license No. 41/UBCK-GP issued by the State Securities Commission on October 28, 2008, operating in the field of fund management.

In 2026, the stock market has generally recorded positive performance, albeit accompanied by continued volatility. Against this backdrop, ACBC has remained flexible in adapting to market developments, effectively capturing investment opportunities while staying aligned with its investment strategy and maintaining strong risk management discipline, with a focus on delivering added value to clients. The Company's business activities are centered on optimizing investment efficiency and pursuing sustainable long-term growth.

As of the end of Q1 2026, ACBC's key financial indicators were as follows:

- Charter capital: 1,050 billion VND
- Profit before tax: VND 11.2 billion VND
- Net profit after tax: VND 9.3 billion VND

In 2026, ACBC will continue to focus on its core business, improving the efficiency of asset management for existing customers, while effectively managing the ACB50 Member Fund to deliver optimal value to customers. ACBC will continue to research, design, and manage new investment funds to diversify the products and services offered to existing and potential customers.

✦ Litigation / Disputes Currently Involving the Company and Ongoing Developments (if any)

The Company is currently involved in a dispute relating to a margin trading agreement with a client. In addition, the Company is a party with related rights and obligations in certain cases where other parties are disputing matters concerning bond purchase agreements and claims for contractual damages.

As of the present time, such disputes and litigation do not have a material impact on the Company's business operations.

✦ Compliance with Payment Obligations of Previously Issued Financial Products

Since 2020, ACBS has offered covered warrants as financial products and fully complied with payment obligations upon warrant maturity as stipulated in Point e, Clause 1, Article 202 of Government Decree 155/2020/ND-CP dated December 31, 2020, and Point g, Clause 1, Article 202a, supplemented by Clause 72, Article 1 of Government Decree 245/2025/ND-CP dated September 11, 2025.

✦ Other information

The State Securities Commission of Vietnam (SSC) issued Decision No. 267/QĐ-XPHC dated 12 September 2025 and Decision No. 410/QĐ-XPHC dated 12 November 2025 imposing administrative sanctions in the field of securities and the securities market on ACB Securities Company Limited.

(*): ACBS operates as a Limited Liability Company, therefore it does not have an EPS (Earnings Per Share) indicator.

VI. INFORMATION REGARDING COVERED WARRANTS

1. General information about warrants

1.1. Information about issued warrants

- Warrant name: **Warrant VPB/ACBS/8M/107 8-month term.**
- Name (code) of the underlying securities: **VPB.**
- Issuer of the underlying securities: **Vietnam Prosperity Joint Stock Commercial Bank.**
- Type of warrant (call): **Call warrant.**
- Type of exercise: **A warrant where the warrant holder can only exercise their right on the**

maturity date.

- Settlement type: Cash settlement.
- Term: **8 months**.
- Expected issuance date: Within 10 (ten) working days from the date the State Securities Commission issues the Certificate of Registration for the offering of covered warrants.
- Maturity date: Exactly 8 months from the date of issuance.
- Conversion ratio: **2:1**.
- Exercise price: Within a range of +/- 20% of the closing price of the underlying stock on the trading day immediately preceding the issuance notice date. The specific exercise price will be announced in the Issuance Notice.
- Minimum offering price (expected): VND 1,000/warrant. The specific offering price will be officially announced in the Issuance Notice.
- The maximum offering price (expected): VND 2,500/warrant. The specific offering price will be officially announced in the Issuance Notice.
- Total warrant offering number: **18,000,000** warrants.
- Total value of warrants offered (expected): **18,000,000,000** (eighteen billion) VND to **45,000,000,000** (forty-five billion) VND.
- Payment security: Cash (VND), deposit as payment security at the Custodian Bank.
- The value of collateral for payment security obligation is expected to be 50% of the value of the warrants offered.
- Pricing method: according to the Black-Scholes formula as follows:

$$C = \frac{N(d_1)S - N(d_2)X e^{-r_c T}}{k}$$

With:

$$d_1 = \frac{\ln\left(\frac{S}{X}\right) + \left(r_c + \frac{\sigma^2}{2}\right)T}{\sigma\sqrt{T}}$$

$$d_2 = d_1 - \sigma\sqrt{T}$$

Where:

C: The theoretical price of the call option.

$N(d_1)$, $N(d_2)$: Cumulative normal distribution probabilities.

Parameter	Calculation method
X: The exercise price of the warrant.	This is determined by ACBS depending on market conditions at the time ACBS is officially licensed to make its initial public offering of warrants.
S: Current stock price.	This is the closing price of the underlying asset at the time ACBS was officially licensed to make its initial public offering of warrants or at the time of calculation for the report.
T: Remaining time until maturity (in years)	This is the number of days from the calculation date to the warrant's maturity date/365.
r_f : Risk-free interest rate (annualized).	The average 12-month savings interest rate of the four banks Vietcombank, Vietinbank, BIDV, and Agribank plus a 2% margin at the time ACBS was officially licensed to offer warrants to the public or at the time of calculation for this report, plus a 2% margin.
σ : Expected price volatility of the underlying security (annualized).	Expected price volatility = past price volatility x (1 + adjustment factor) In there: <ul style="list-style-type: none"> - The past price volatility of an underlying security is determined over the most recent 12 months. - The adjustment factor is determined based on market demand for warrants and underlying securities, the liquidity of the warrants and underlying securities, and the expected price volatility of similar warrants.
k: Warrant conversion ratio	This is the number of warrants required to convert into one unit of underlying securities.

1.2. Information about previous issuances of similar warrants (for the case of a supplementary offering): N/A.

2. Information about the underlying securities and the issuer of those securities.

2.1. Information about the underlying securities

- Name of the underlying securities: Vietnam Prosperity Joint Stock Commercial Bank shares
- Initial listing date of the underlying securities (VPB): August 17, 2017,
- Price-to-Earnings (P/E) ratio (based on EPS of the last 4 quarters and price as of April 29,

2026): 8.0 times

- Market capitalization (as of April 29, 2026): VND 210,249 billion
- Average fluctuation of the underlying stock price (VPB) over the last 6 months (annual): 37 %
- Liquidity and price volatility in 2025:
 - ✓ Average trading volume during the year: 28,171,011 shares;
 - ✓ Highest trading price of the year (adjusted price): VND 38,650 /shares;
 - ✓ Lowest trading price of the year (adjusted price): VND 15,527 /shares;
 - ✓ Closing price on the last trading day of the year (adjusted price): VND 28,650 /shares;
- The closing price (adjusted price) of the underlying security on the last trading day of each month within the last 12 months (VND/share)

January 2025	18,400
February 2025	18,800
March 2025	18,500
April 2025	16,100
May 2025	18,000
June 2025	18,500
July 2025	25,800
August 2025	35,000
September 2025	31,100
October 2025	28,700
November 2025	29,300
December 2025	28,700

2.2. Information about the issuer of the underlying securities:

- Name of issuing organization: Vietnam Prosperity Joint Stock Commercial Bank
- Underlying security code: VPB
- Area of activity: Finance - Banking.

Business performance:

3. Warrant distribution period

ACBS plans to distribute warrants immediately after receiving the Certificate of Registration for Offering Covered Warrants from the State Securities Commission as per regulations.

The distribution of warrants to investors is expected to take place within **10 working days** from the effective date of the Certificate of Registration for the Offering of Covered Warrants, with a minimum of **3 days for investors to register to purchase**.

The expected warrant distribution schedule is as follows:

No.	Content	Estimated time	Note
1	State Securities Commission issues Certificate of Registration for Offering Secured Warrants	T	Working day
2	Publish information regarding the Certificate of Registration for the Offering of Secured Warrants issued by the State Securities Commission.	T → T+1	Within 24 hours from date T
3	Publish information about the issuance on the website of the issuer and the stock exchange, including: - Warrant Issuance Notice - Warrant Offering Prospectus	T+2 → T+3	Within 3 working days from date T
4	Publish the Warrant Issuance Notice in one electronic or print newspaper for three consecutive issues.	T+2 → T+7	
5	Distribute warrant (where the minimum subscription period for investors is 3 days)	T+3 → Maximum T+7	
6	Report and disclose information on the results of warrant distribution (within 3 working days from the date of completion of warrant distribution).	T+8 → T+9	Within 3 working days from day T+7

(*) Note:

- The specific distribution schedule will be officially announced in the Warrant Issuance

Notice.

- The collateral for payment security obligation is deposited by ACBS at the custodian bank for the entire validity period of the warrants and must maintain a minimum of 50% of the value of the issued warrants, excluding the number of warrants that have been delisted. This asset may not be used as collateral, mortgage, or security for loans or other financial obligations of ACBS or any other third party.
- The distribution of warrants will only take place after ACBS ensures that warrant buyers have access to the Prospectus.

4. Warrant purchase registration

Registration period

ACBS will officially announce the subscription period in the Warrant Issuance Notice after receiving the Certificate of Registration for the Offering of Covered Warrants from the State Securities Commission. The minimum time for investors to subscribe is **3 days** and is expected to follow the schedule presented in Section 3, Part VI above.

Registration method

Investors register to purchase through online channels:

- Visit SMART.acbs.com.vn
- Through the ACBS SMART application

Payment method

When registering to purchase warrants, investors simultaneously deposit the warrant purchase price into the Company's escrow account according to the following information:

- Account holder: **ACB Securities Company Limited.**
- Account number: **8680105331**, at BIDV, Nam Ky Khoi Nghia Branch.

In case warrants have not been fully distributed

In the event that the total number of warrants subscribed by investors is less than the number of warrants offered, the issuer may transfer the unsold warrants to its proprietary trading account and continue to distribute them through market-making activities on the HOSE trading system after the warrants are listed on HOSE.

In case the number of warrants subscribed exceeds the number of warrants offered for sale

In the event that the total number of warrants subscribed by investors exceeds the number

of warrants offered, the number of warrants each investor is entitled to purchase will be determined based on the principle of allocation according to the subscription ratio of the investors, specifically as follows:

$$\text{The number of warrants each investor is allowed to purchase} = \frac{\text{Total number of warrants offered} \times \frac{\text{Number of warrants each investor registered to purchase}}{\text{Total number of warrants registered for purchase by investors}}}{1}$$

The number of warrants allocated to each investor will be rounded down to the nearest hundred (**100 warrants**), and the total number of warrants distributed to all investors will not exceed the total number of warrants offered.

In the event that any remaining warrants arise after rounding down (if any), these warrants will be allocated equally among investors with the largest equal purchase volume. If, after the above allocation, there are still remaining warrants, these remaining warrants will be allocated to ACBS's proprietary trading account.

5. Cancellation of the offering of covered warrants

In the event that the Company's public offering of securities is canceled in accordance with Article 28 of the Securities Law 2019 and other relevant regulations (if any), the Company is responsible for disclosing information about the cancellation of the offering in accordance with the law. Simultaneously, within 15 (fifteen) days from the date the offering is canceled, the Company will recall all issued securities and fully refund the amount paid by investors (excluding interest, if any), through the payment method announced by the Company during the offering. After the aforementioned period, the Company is responsible for compensating investors for damages in accordance with the published commitments and relevant laws.

6. Exercise warrants

6.1. **When warrants reach their maturity date, payment will be made as follows** (assuming that day T is the last registration date, which is also the maturity date, and T is calculated in working days):

- Day T - 7: VSDC prepares and sends to HOSE and the Depository Members a Notice regarding the closing of the list of warrant holders for exercise of warrants.
- Day T: ACBS sends VSDC a notification of the warrant settlement price.

- Day T + 1 (9:00 AM): VSDC creates and transfers the List of Warrant Holders to the Custodian Member (in the form of electronic documents).
- Day T + 1 (11:00 AM): The depository member verifies the information in the List provided by VSDC and sends VSDC a confirmation notification (in the form of an electronic document).

In the event of confirmation of errors or discrepancies in data, the Depository Member must send VSDC a document specifying the erroneous or inaccurate information for coordination with VSDC to make corrections. Immediately after the corrections are made, VSDC will provide the corrected List to the Depository Member (in electronic form).

- Day T + 2: VSDC sends ACBS the consolidated list of warrant holders.
- Day T + 3: ACBS sends VSDC a Confirmation Notice of the Consolidated List of Warrant Holders. If ACBS does not approve the information in the List, it must send a written notice to VSDC stating the reasons.

On day T+3, ACBS transfers the full payment amount to the warrant holder's deposit account as notified by VSDC.

- Day T + 4: VSDC allocates payment funds to warrant holders into the account of the relevant Depository Member. The Custodian Member is responsible for allocating funds to warrant holders on the settlement day (Day T + 5).
- Day T + 5: is the payment date. On this date, the Depository Member allocates the payment to the investors.

Note:

- The payout amount per warrant unit: This is the amount per warrant unit in the case where the settlement price is greater than the exercise price, calculated from the difference between the settlement price and the exercise price, equal to [(settlement price – Exercise price)/conversion ratio].
- The settlement price of the warrant upon exercise of the right is the average closing price of the underlying securities during the five (05) trading days immediately preceding the maturity date, excluding the maturity date.
- In cases where the underlying securities price is adjusted in accordance with the Regulations of the Stock Exchange within five (05) trading days prior to the maturity date, the closing price of the underlying stock on the trading days preceding the ex-date shall be adjusted accordingly. The calculation methodology and rounding rules applied to these adjusted closing prices shall be consistent with those applied on the ex-rights trading date. The issuer shall determine the settlement price used as the basis for calculating the cash settlement amount and disclose this settlement price for all outstanding warrants on the maturity date.

Example:

The covered warrant VIB/ACBS/Call/EU/Cash/10M/48 (HOSE: CVIB2306) has:

- Last trading date: August 21, 2024
- Maturity date: August 23, 2024
- The settlement price of the warrant is defined as the average closing price of the underlying stock (VIB) over the last five (05) trading days prior to the maturity date, excluding the maturity date itself. In this case, the relevant trading days are: August 16, 2024; August 19, 2024; August 20, 2024; August 21, 2024; and August 22, 2024.

During this five-day averaging period, VIB underwent an ex-rights event that resulted in an adjustment to the underlying stock price.

The Ho Chi Minh City Stock Exchange (HOSE) announced (Notice No. 1453/TB-SGDHCM) the record date as follows:

- Listed organization: Vietnam International Commercial Joint Stock Bank
- Stock code: VIB
- Security type: Ordinary shares
- Par value: VND 10,000
- Ex-date: August 22, 2024
- Record date: August 23, 2024
- Purpose: Issuance of bonus shares from equity to increase charter capital by VND 4,312,572,810,000
- Exercise ratio: 100:17

Accordingly, the settlement price of warrant CVIB2306 is calculated as follows:

Date	VIB - closing price (unadjusted)	VIB - adjusted closing price (before rounding)	VIB - adjusted closing price (rounded)
22/08/2024 (Ex-date of VIB)	18,400	18,400.0	18,400
21/08/2024	21,350	$[21,350 / (1 + 17\%)] = 18,247.9$	18,250
20/08/2024	21,400	$[21,400 / (1 + 17\%)] = 18,290.6$	18,300
19/08/2024	21,500	$[21,500 / (1 + 17\%)] = 18,376.1$	18,400
16/08/2024	21,150	$[21,150 / (1 + 17\%)] = 18,076.9$	18,100
Settlement price of warrant CVIB2306		$[18,400 + 18,250 + 18,300 + 18,400 + 18,100] / 5 = 18,290$	

- Net payment amount: This is the amount paid after deducting any costs associated with exercising the right (personal income tax and other expenses, if any).

- If the investor does not place an order to exercise the warrant, the profitable warrant will be automatically exercised in cash on the maturity date.

6.2. Measures to be taken in case the issuer becomes insolvent:

In the event that the issuing organization becomes insolvent, payment to investors shall be made according to the asset liquidation process as stipulated in Clause 3, Article 13 of Circular 122/2025/TT-BTC dated December 22, 2025, issued by the Ministry of Finance guiding the issuance of covered warrants. Assets used to pay investors shall come from the following sources:

- Hedging assets and other assets held in the proprietary trading account;
- Assets held in an escrow account at the custodian bank;
- Payment guarantee or other collateral (if any);

If the issuer still lacks sufficient assets to pay the investors, the matter will be resolved according to the relevant legal provisions applicable to partially secured creditors.

7. Rights of warrant holders

- Rights of the warrant holder: the warrant holder is entitled to receive the difference when the price of the underlying security is higher than the exercise price at the time of exercise.
- In the event of the issuer's insolvency, bankruptcy, or dissolution: the settlement of rights for warrant holders shall be carried out in accordance with the relevant laws applicable to partially secured creditors.
- In the event that warrants are delisted due to the issuer suspending or temporarily ceasing operations; merging, consolidating, dissolving, going bankrupt, or having its establishment and operation license revoked; when the registration dossier for the warrant offering is found to contain false or omitted important information that could affect investment decisions and cause losses to investors; due to the delisting of the underlying securities; or when the stock index cannot be determined due to force majeure reasons as clearly stipulated in the principles for index determination; or when the Stock Exchange deems it necessary to protect the rights of investors, the method for calculating the settlement price of warrant holders from the effective date of delisting shall be applied according to the Black-Scholes formula as stated in section 1.1, part V of this Prospectus.

8. Adjusting warrants

- The issuer must adjust warrants in the following cases: The price of the underlying security is adjusted due to the issuer distributing cash dividends, issuing shares to pay dividends,

issuing shares to increase share capital from equity, issuing new shares, etc.

- The method for adjusting the exercise price and conversion ratio of warrants when the underlying security experiences a corporate event is as follows:
 - ✓ Adjustment time: The ex-dividend date of the underlying asset.
 - ✓ New exercise price = Old exercise price \times (Adjusted reference price of the underlying asset on the ex-dividend date/Unadjusted reference price of the underlying asset on the ex-dividend date).
 - ✓ New conversion ratio = Old conversion ratio \times (Adjusted reference price of the underlying asset on the ex-dividend date/Unadjusted reference price of the underlying asset on the ex-dividend date).
- The adjusted exercise rate or exercise price should be rounded to four decimal places.
- Any further adjustments will be based on HOSE's adjustment decision, and the issuer will make appropriate adjustments in accordance with regulations.

9. Fees, charges, and taxes arising from the trading or exercise of warrants.

- **Transaction fees:** These apply when investors place buy or sell orders for warrants. The fee rate is determined by the securities company where the investor has opened their warrant trading account.
- **Tax:** When investors transfer warrants, hold warrants until maturity, and exercise profitable warrants, the applicable tax rate is 0.1% on the warrant transfer price for each transaction.

***Note:** In some cases, the amount of tax payable may be higher than the amount paid by the investor received from the issuer, depending on the correlation between the settlement price of the underlying security and conversion ratio.*

Examples of how to calculate taxes:

- ✓ **Case 1:** Applies when the investor transfers warrants before the maturity date (tax rate of 0.1% on the transfer price of the warrants for each transaction).

***Example 1:** An investor buys 100 call warrants with MWG as the underlying asset at a price of VND 2,000/warrant, a conversion ratio of 1:1, and a strike price of VND 30,000. If the investor sells these 100 warrants at a price of VND 3,000/warrant, the tax payable is: VND 3,000 \times 100 \times 0.1% = VND 300.*

- ✓ **Case 2:** Applies when an investor holds warrants and these warrants are delisted before the maturity date (tax rate of 0.1% on the warrant transfer price for each transaction). In this case, the warrant transfer price for each transaction is:

- The repurchase price at the market price set by the Issuer through market-making activities x Number of warrants (before the effective delisting date); or;
- The settlement price of the warrants is announced by the issuer x Number of warrants (after the effective delisting date).

Example 2: Corresponding to the assumptions in Example 1, if the warrants are delisted and the issuer announces the settlement price of the warrants as VND 3,000/warrant, then the tax the investor must pay for the 100 warrants they own is: $3,000 \times 100 \times 0.1\% = \text{VND } 300$.

- ✓ Case 3: Applies when the investor holds the warrant until maturity and exercises the warrant for a profit (tax rate of 0.1% on the warrant transfer price for each transaction). In this case, the warrant transfer price for each transaction is the settlement price of the underlying security as announced by the Stock Exchange.

Example 3: Corresponding to the assumptions in Example 1, if the settlement price of the underlying security announced by the Stock Exchange at the time of exercising the right is VND 30,000/share, then the tax the investor must pay when exercising the right for 100 warrants they own is: $\text{VND } 30,000 \times 100 \times 0.1\% = \text{VND } 3,000$

- ✓ Case 4: In some cases, the amount of tax payable may be higher than the amount of payment the investor receives from the issuer, depending on the correlation between the settlement price of the underlying security and the conversion ratio.

Example 4: An investor buys 100 call warrants with MWG as the underlying asset, with a conversion ratio of 1:1 and a strike price of VND 100,000.

If an investor holds the warrant until the maturity date and the settlement price of the underlying security announced by the Stock Exchange at the time of exercising the right is VND 100,100/share, then the warrant will expire in a profitable state and the investor will receive a payment from the issuer of: $(100,100 - 100,000) \times 100 = \text{VND } 10,000$.

The tax payable by the investor when exercising the rights for the 100 warrants they own is: $100,100 \times 100 \times 0.1\% = 10,010 \text{ VND}$.

Therefore, in this case, the amount of tax payable by the investor is higher than the amount of payment received by the investor by $(10,010 - 10,000) = 10 \text{ VND}$.

- **Exercise fee:** Investors must pay VSDC a fee as stipulated.
- **Custody and transfer fees :** Applied according to VSDC regulations.

**10. Market making activities**

ACBS must participate in placing market-making orders within five (05) minutes from the occurrence of one of the following events:

- ✓ *Only buy or sell orders for warrants are accepted.*
- ✓ *There are no buy or sell orders for the warrants.*
- ✓ *The market price spread exceeds 5%. The price spread is the percentage of (lowest bid price – highest bid price) / highest bid price.*

When participating in the market making activity, ACBS must comply with the following:

- ✓ *The minimum order size is 100 warrants.*
- ✓ *The type of order used is a limit order.*
- ✓ *The order price must not exceed a spread of 5%.*
- ✓ *In the absence of buy and sell orders for warrants, ACBS must quote prices in both directions (placing both bid and ask orders).*
- ✓ *The minimum time an order remains on the trading system is one (01) minute.*

In the following cases, ACBS is not required to perform market-making activities:

- ✓ *The periodic order matching session determines the opening price (ATO), the first five (05) minutes after the end of ATO, and the periodic order matching session determines the closing price (ATC).*
- ✓ *Trading of the underlying asset of the warrant has been suspended.*
- ✓ *The theoretical price of the warrant, calculated according to the formula stated in ACBS's prospectus, is less than or equal to 10 VND.*
- ✓ *If the number of warrants in the market maker account does not meet the minimum quantity (100 warrants), ACBS will be exempt from placing sell orders.*
- ✓ *Since no warrants have been issued (in the case that ACBS has not yet sold any warrants to investors), ACBS is exempt from placing buy orders.*
- ✓ *In the event of delisting warrants, ACBS is exempt from placing sell orders.*
- ✓ *If the warrant price reaches the ceiling (excess buy orders at the ceiling price), ACBS is exempt from placing sell orders, or if the warrant price falls to the floor (excess sell*

orders at the floor price), ACBS is exempt from placing buy orders.

- ✓ *When the underlying security price reaches its ceiling (excess buy orders at the ceiling price), ACBS is exempt from placing sell orders for call warrants and is exempt from placing buy orders for put warrants.*
- ✓ *When the underlying stock price falls to its floor price (excess sell orders at the floor price), ACBS is exempt from placing buy orders for call warrants and exempt from placing sell orders for put warrants.*
- ✓ *For warrants that are in a profitable state of 30% or more (i.e., call warrants with the underlying security price higher than 30% of the strike price or put warrants with the underlying security price lower than 30% of the strike price), ACBS is exempt from placing sell orders.*
- ✓ *Within 14 days before the warrant expires.*
- ✓ *When force majeure events occur, such as natural disasters, fires, wars, etc.*
- ✓ *Other cases will be applied by the Stock Exchange after obtaining the approval of the State Securities Commission.*
- ✓ *The Vietnam Stock Exchange will monitor ACBS's market-making pricing practices and request explanations from ACBS if necessary.*

VII. PAYMENT GUARANTEE PLAN FOR HOLDERS OF COVERED WARRANTS

- 1. Payment to covered warrants holders is secured by the following assets**
 - a. Hedging assets and other assets held in the proprietary trading account;
 - b. Assets held in an escrow account at a custodian bank;
 - c. Payment guarantee or other collateral (if any).
- 2. In the event that there are insufficient assets to settle the warrant exercise, the settlement of rights for covered warrants holders shall be carried out in accordance with the relevant laws applicable to partially secured creditors.**

VIII. RISK MANAGEMENT OF COVERED WARRANT

- 1. Risk management process**
 - 1.1. The role of senior management in monitoring risk management, including the roles of relevant departments.**
 - + The Board of Members of ACBS**

- Approve ACBS's warrant issuance activities within the limits stipulated at ACBS.
- Approve the allocation of funds for the entire warrant issuance activity in accordance with the regulations of the State Securities Commission and the law.
- Approve scenarios for risk hedging activities related to warrant issuance, including but not limited to determining size limits, maximum loss limits, expected returns, and hedging positions; in accordance with investment limits and risk appetite in investment activities approved by the Board of Members of ACBS (if any).
- Approve and issue the risk management procedure and related internal procedures.

✦ **Presidents & CEO of ACBS**

- Responsible for implementing approvals from the Board of Members of ACBS.
- Act in accordance with the decision-making authority and limits set by the Board of Members of ACBS.
- Ensure that the process is fully and clearly established and organized.

✦ **Risk Management Department:**

- Propose scale limits and loss-prevention limits for risk mitigation activities in accordance with internal regulations and legal requirements.
- Monitor and warn of risks related to limitations in hedging operations for warrant issuance activities, market risks, and other fluctuations affecting ACBS's capital and benefits.
- Provide recommendations or warnings when risk mitigation activities for warrant issuance reach internal or regulatory limits or constraints.

✦ **Derivatives Market Department**

Monitor, comply with, and warn of risks related to the limitations of hedging activities for warrant issuance, market risks, and other fluctuations affecting ACBS's capital and benefits. Simultaneously, immediately report these matters to the competent authority for review and appropriate action.

✦ **Legal Department**

Verify the legal compliance of the contents of the Risk Management Procedure related to ACBS's warrant issuance activities.

✦ **Internal Control Department**

Monitoring the implementation of risk management regulations and procedures to ensure these activities are carried out carefully, in the correct order, and in compliance with internal

regulations and applicable laws.

1.2. Risk management process

ACBS implements a risk management process in its warrant trading operations following these steps, procedures:

✦ Step 1: Identify potential risks arising from warrant trading.

In the issuance of warrants, ACBS may encounter the following main risks:

- a. Payment risk :** This risk arises when ACBS is unable to fulfill part or all of its committed obligations to investors. For example, ACBS becomes insolvent when investors exercise their rights due to insufficient shares or cash.
- b. Market risk:**
 - Risks arise from micro and macroeconomic fluctuations that negatively impact one or more industries or specific businesses, thereby causing panic and sell-offs of warrants or underlying assets.
 - Risks arise from fluctuations stemming from socio-political factors both domestically and internationally, leading to widespread sell-offs of warrants or underlying assets;
 - Risks arise from price and liquidity manipulation activities in the market that ACBS has not yet been able to identify or is unable to identify.
- c. Legal risks:**
 - Risks arise from ACBS's business policies not complying with current legal regulations;
 - Risks arise from ACBS departments, operations, and employees performing their work in a manner that does not comply with current legal regulations.
 - Risks arise from unfavorable changes in relevant legal regulations or ACBS's difficulty in quickly adapting to changes in legal requirements, resulting in incomplete compliance with legal regulations.
 - Risks arise from unclear terms in economic contracts, leading to customer lawsuits or ACBS being unable to sue customers, or having a low chance of winning the case.
 - Legal risks may arise that lead to ACBS being fined, warned, temporarily suspended from operation, or having its warrant trading license revoked.
- d. Operational risks:**
 - Risks arise because ACBS has not yet finalized/updated its current operating procedures.
 - Risks arising from human error or system issues may lead to clients conducting

transactions that do not comply with regulations at ACBS.

- Risks arise from human error or trading system errors leading to incorrect calculations of hedging ratios/values, resulting in the purchase or sale of underlying securities/warrants exceeding the risk neutrality.
- Risks arise from employees inadvertently or intentionally failing to follow procedures and guidelines in operational departments.
- Risks arise from external objective factors such as natural disasters, wars, epidemics, etc.
- e. **Liquidity risk:** The risk that arises when ACBS is unable to execute, or executes at a higher cost, buys/sells transactions to achieve risk neutrality due to the stock's lack of or low liquidity.

✚ Step 2: Risk Analysis

- a. **Payment risk:** Given ACBS's scale and history of managing funds and assets, the likelihood of this risk occurring at ACBS is low. In addition, ACBS also implements hedging activities as required by regulations to ensure that shares are paid to customers on the exercise date.
- b. **Market risk:** This is the biggest and most likely risk, as well as the most difficult to prevent, in the business of issuing covered warrants; when this risk arises, it also causes significant losses to ACBS's business operations.
- c. **Legal risks:** These can occur if ACBS inadvertently fails to properly perform an activity due to a lack of consultation from the Legal sub-department, or because it has not yet updated its practices to reflect changes in regulations and policies.
- d. **Operational risks:** Risks related to software system errors are possible, in addition to risks related to employees making mistakes in procedures.
- e. **Liquidity risk:** Under normal market conditions with large-cap stocks, this risk is low. However, liquidity risk can still occur due to sudden positive/negative news about the company, or information that negatively impacts the entire market.

✚ Step 3: Risk Control

Based on an assessment of the significant risks that may occur in warrant trading at ACBS, the company has developed specific risk control measures for each type of risk as follows:

- a. **Payment risk:**
 - Risk hedging principle:
 - ✓ *Maintain a neutral risk hedging ratio at a certain rate, but not lower than the*

requirements of the Securities and Exchange Commission;

- ✓ *In addition, ACBS always maintains reserve assets to ensure its ability to meet payment obligations when maturing warrants.*
- *How to do it:*
 - ✓ *Execute daily buy/sell transactions of the underlying asset or warrant to ensure hedging at a risk-neutral level;*
 - ✓ *ACBS's overall liquidity risk assessment includes any anticipated payment obligations arising from maturing warrants.*
- *Infrastructure for implementation: Trading software system, Excel software, BI system, monitoring reports.*

b. Liquidity risk

- *Risk hedging principle: Ensure that hedging transaction costs are kept to a minimum.*
- *How to implement it: Always trade to ensure a regulated risk neutrality ratio, only issue warrants for large-cap and stable-liquidity stocks. In addition, there are regulations on the maximum volume of shares or underlying assets that must be traded to limit liquidity risk.*
- *Infrastructure for implementation: Trading software system, monitoring reports.*

c. Operational risk

- *Risk hedging principle: Minimize the occurrence of operational risk events.*
- *How to do it:*
 - ✓ *The business units have established comprehensive operational procedures related to the trading of covered warrants.*
 - ✓ *Provide comprehensive training to all relevant personnel on products and processes to ensure that procedures are implemented correctly and completely.*
 - ✓ *Conduct risk awareness and risk hedging training for all personnel to minimize potential fraud.*
 - ✓ *Thoroughly test all trading and support software systems before deployment. In addition, always take into account feedback from ACBS customers or staff to make adjustments if necessary.*
 - ✓ *There is support, inspection, and supervision from the risk management sub-department, internal control sub-department.*

Tools used:

- ✓ *Work processes.*
- ✓ *Instructional and training materials.*

d. Legal risks

- Risk hedging principle: Comply with relevant legal regulations.
- How to do it:
 - ✓ *The legal department reviews processes or product policies before they are released and put into use.*
 - ✓ *The legal department regularly updates itself on changes in legal documents so that it can promptly adjust business operations if necessary.*
 - ✓ *Providing awareness training for ACBS employees on the legal risks of violating regulations.*
- Tools used: Legal documents, policies, and procedures of ACBS.

✚ **Step 4: Risk Monitoring**

- Risk management activities are monitored daily or periodically through specific monitoring reports as stipulated by the State Securities Commission, Ho Chi Minh City Stock Exchange (HOSE), and ABCS. Risk monitoring for hedging activities is carried out according to the hedging procedure.
- Regularly analyze and assess past risks to identify areas with high potential risks and implement appropriate risk mitigation and control measures.

2. Risk hedging plan

2.1. Purpose of hedging

To ensure the ability to pay warrant holders and effectively limiting losses caused by potential risks to ACBS and warrant holders.

2.2. Organization of hedging activities

The board of management is responsible for

- Directing the development of strategies, policies, and procedures for managing warrant risks.
- Assign responsibilities and monitor the implementation of the risk management process that has been issued by the competent authority.
- Monitor performance and be accountable to the competent authority for the exercise of rights and responsibilities in risk management.

The Internal Control Sub-Department (part of the Internal Control Department) is responsible for

- Monitor and supervise compliance with legal regulations, company charter, decisions of the Board of Members, and related documents.
- Inspect and monitor issuance and risk mitigation activities in accordance with company regulations, procedures, and policies.
- Monitor and assess any conflicts of interest (if any).

The Risk Management Sub-Department (part of the Risk Management Department) is responsible for

- Monitor and supervise the risk prevention activities of the department directly involved in hedging of warrants.
- Warning to the board of management regarding the limits set by ACBS, the Stock Exchange, and the State Securities Commission related to the issuance and hedging of warrants.
- Advise the board of management on measures to prevent, mitigate, and manage risks.
- Ensure that risks are managed in accordance with ACBS policies and compliance with risk management regulations issued throughout the system.

The Derivatives Market Department is responsible for

- Directly involved in the risk hedging process for warrants.
- Conducting hedging activities involving the purchase and sale of underlying securities, and submitting daily reports on the difference between the theoretical hedging position and the actual hedging position as required by the State Securities Commission and the Stock Exchange.
- Responsible for providing information and coordinating with the the Risk Management Department to manage and control risks for covered warrant.

Information about the personnel in the department directly responsible for risk hedging activities for warrants.

Mr. Huynh Minh Tuan – Head of Derivatives Market Department.

Qualifications: Certified Financial Analyst (CFA) Level 3, Certified Financial Analyst License issued by the State Securities Commission.

Experience: 8 years of experience working in the field of securities analysis and investment.

2.3. General implementation principles

ACBS applies a delta-neutral hedging strategy, meaning that along with issuing warrants, ACBS will simultaneously execute buy and sell transactions of the underlying securities to keep ACBS's total hedging position from falling below the minimum hedging ratio required by the State Securities Commission when the price of the underlying securities changes.

a. Hedging securities

- The underlying securities of warrants.

b. Risk hedging position

How to calculate the risk hedging factor

- The risk hedging factor applied by ACBS is the Delta factor.
- Delta: The delta risk hedging factor is the value representing the change in the warrant price in response to a change in the price of the underlying security.
- Delta is calculated based on the Black-Scholes formula as follows:

$$\text{Delta}_{\text{CALL}} = N(d_1)$$

In there:

- $\text{Delta}_{\text{CALL}}$: Delta value of the call covered warrants;
- $N(d_1)$: Cumulative normal distribution probability, with d_1 determined by the Black-Scholes valuation formula as follows:

$$d_1 = \frac{\ln\left(\frac{S}{X}\right) + \left(r_c + \frac{\sigma^2}{2}\right)T}{\sigma\sqrt{T}}$$

The input parameters in the above formula are defined as follows:

Parameter	Calculation method
X: The exercise price of the warrants	This is determined by ACBS depending on market conditions at the time ACBS is officially licensed to make its initial public offering of warrants.
S: Current price of the underlying security.	This is the closing price of the underlying security at the time ACBS is officially licensed to make its initial public offering of warrants or at the time of calculation for the report.
T: Remaining time until maturity (calculated annually)	The number of days from the calculation date to the maturity date of warrants / 365.

r_f : Risk-free interest rate (calculated annually).	The average 12-month savings interest rate of the four banks Vietcombank, Vietinbank, BIDV, and Agribank at the time ACBS is officially licensed to make its initial public offering of warrants or at the time of calculation for this report, plus a margin of 2%.
σ : Expected price volatility of the underlying security (calculated annually).	Expected price volatility = past price volatility \times (1 + adjustment factor) In there: <ul style="list-style-type: none"> - The past price volatility of an underlying security is determined over the most recent 12 months. - The adjustment factor is determined based on market demand for warrants and underlying securities, the liquidity of the warrants and underlying securities, and the expected price volatility of similar warrants.
k: Warrant conversion ratio	This is the number of warrants required to convert into one unit of the underlying security.

Theoretical risk hedging position

- ACBS determines the theoretical hedging position based on the Black-Scholes formula as follows:

$$P = \text{Delta} \times \text{OI} / k$$

In there:

- P: The number of underlying securities that ACBS plans to hold to hedge against the risk of the warrants.
- OI: Determines the theoretical risk hedging position. OI = Number of outstanding warrants + Number of warrants sold from the proprietary trading account but not yet recorded in the investor's account by VSDC - Warrants awaiting delivery to the issuer's proprietary trading account.
- k: The conversion ratio of warrants.
- Delta: The delta risk hedging factor is the change in the warrant price corresponding to a change in the price of the underlying security, calculated using the formula $\text{DeltaCALL} = N(d1)$.

Actual risk hedging position

- The difference between the theoretical hedging position and the actual hedging position

on day T of the warrant is determined as follows:

$$\Delta p_T \% = (P_T - p_T) / P_T \times 100 \%$$

In there:

- $\Delta p_T \%$: The difference between the theoretical hedging position and the actual hedging position on day T.
- P_T : The theoretical hedging position of a warrant on day T.
- p_T : The actual hedging position of the warrant on day T.
- P.TTPS ACBS implements risk hedging measures to ensure that the difference between the theoretical hedging position and the actual hedging position at the end of the trading day does not exceed 20%.
- To hedging risks, P.TTPS must ensure compliance with the principles stipulated in the Investment Policy and the approval of the Investment Council regarding risk hedging limits for each period. Any instances exceeding these limits require the approval of the President & CEO or the competent authority.
- The hedging position must be managed by ACBS on a case-by-case basis.

c. Risk prevention plan

- ACBS applies a delta-neutral hedging strategy, meaning that along with issuing warrants, ACBS will simultaneously execute buy and sell transactions of the underlying securities to keep ACBS's total hedging position from falling below the minimum hedging ratio required by the State Securities Commission when the price of the underlying securities changes.

d. Example

- Assume that ACBS issues covered warrants with the following input parameters:
 - Underlying asset: ABC (hypothetical underlying security ticker symbol).
 - Issuance date: October 15, 2020.
 - Listing date: October 22, 2020.
 - Maturity date: January 15, 2021.
 - Conversion Ratio: 1:1.
 - Interest rate: 7%.
 - Expected price volatility: 36%.
 - Exercise Price: 24,000.

ACBS buys and sells ABC shares when the ABC share price changes as follows:

Day	ABC stock price (VND)	Delta	Number of outstanding warrants	Theoretical risk hedging position (Shares)	Actual risk Hedging position (Shares)	Change in Number of ABC shares
21/10/2020	24,000	0.57	1,000,000	570,000	700,000	0
22/10/2020	25,000	0.66	900,000	594,000	700,000	0
23/10/2020	23,500	0.53	900,000	477,000	700,000	0
26/10/2020	24,500	0.62	950,000	589,000	700,000	0
27/10/2020	26,000	0.74	1,000,000	740,000	900,000	+ 200,000
28/10/2020	25,000	0.66	1,000,000	660,000	800,000	-100,000

3. Experience in issuing warrants

ACBS has experience in issuing warrants as follows

✦ The covered warrants are outstanding and listed on HOSE

No.	Warrant name	Warrant code	Type	Term	Issuance date	Maturity date	Conversion ratio	Exercise price (VND)	Total number of warrants offered
1	HPG/ACBS/Call/EU/Cash/10M/87 Warrant	CHPG2604	Call	10 months	26/12/2025	26/10/2026	3:1	29,000 VND	19,000,000

3. Underwriter or Issuing Agent, Advisory Organization: None**X. CONFLICT OF INTEREST**

We, our branches, transaction offices, and subsidiaries may engage in investment, brokerage, fund management, and other activities that may give rise to material information regarding the Company and/or the underlying securities or issuers, or may publish research reports relating to the Company and/or the underlying securities. Such activities, information, and/or research reports may relate to or affect the Company and the underlying securities, and may result in adverse consequences for investors or create conflicts of interest in connection with the issuance of warrants. We are under no obligation to disclose such information and may issue research reports and engage in any such activities independently of the warrant issuance.

In the normal course of business, we, our Head Office, branches, transaction offices, and subsidiaries may conduct transactions for our own account or for our clients and may participate in transactions related to the Company and/or the underlying securities or related derivative products. This may indirectly affect the interests of investors.

As of the date of submission of the application and completion of relevant procedures for the issuance of warrants based on the underlying securities of the Issuer, ACB Securities Company Limited is not a related party of the Custodian Bank, Audit organization or the issuer of the underlying securities.

**XI. UNDERTAKINGS**

The Issuer hereby undertakes full responsibility for the accuracy and truthfulness of the information contained in this Prospectus and all attached documents.
